

# BigID

## Industry:

Retail, Transportation & Logistics

## Technologies:

## Customer

BigID was founded in 2016 with the objective of creating a data intelligence platform that enables organizations to know their enterprise data and take action for privacy, protection, and perspective. Customers deploy BigID to proactively discover, manage, protect, and get more value from their regulated, sensitive, and personal data across their data landscape.

## Challenge

BigID and its partners created software add-ons for their core BigID products and did not have a way to expose those add-ons to their customer base.

## Solution

Eagle Creek used the Salesforce B2B Commerce platform to create a Marketplace that BigID customers can use to explore and purchase apps, connectors, and utilities for their BigID core products. The Marketplace also enables BigID's partners to submit new software add-ons, which are reviewed and potentially certified by BigID before they are added to the Marketplace.

## Eagle Creek at a Glance

In 1999, Eagle Creek was founded to deliver a technology value proposition that positively impacts your business. We focus on customer-facing technologies – from CRM to App Dev to Mobility – helping our clients succeed in digital business.

We combine on-site expertise with our offsite (but onshore) consultants based in our four technology centers in the upper Midwest.

Through this model, we help you reduce your backlogs while optimizing your IT budget. Achieving this consistent and sustainable way to provision digital consulting capabilities to you has meant investing in America, where Eagle Creek has become the leader in U.S. Onshoring.

Eagle Creek is now an Eviden business.
