CUSTOM APPLICATION DEVELOPMENT

eagle creek software services

Multiple technology platform support improves efficiency for development efforts

Unique Delivery Model

Eagle Creek is the largest US-based onshore service provider specializing in front office technologies and custom application development, with a focus on Web/Mobile platforms. Eagle Creek employs a unique onshore delivery model through the use of onsite and offsite (but onshore) consultants based in our Technology Centers. The Eagle Creek delivery model allows our customers a high quality, low cost, nominal risk alternative to offshore or costly traditional third party development.

Application Development Growth

Custom application development continues to gain in popularity, despite the pervasiveness of enterprise applications. This is driven by the availability of standard and open source tools, a growing sense that enterprise applications are insufficient, and the recognition of the opportunity to differentiate the business through technology innovation.

B2B, B2C and Mobile Expertise

Our full cycle development teams can meet all of your B2B, B2C or Mobile application development needs. Our development efforts can be optimized for iOS, Android and Microsoft devices. We can also develop applications that are platform independent, allowing for spin up for new technology devices with minimum efforts.

Technology Competency

We are experienced in multiple technologies and a number of different technology stacks including:

- Drupal
- Java
- Kuali
- .Net
- HTML
- XML
- UML
- CSS
- PHP
- SOAP
- HTTP
- Open Source Enterprise Applications
- SharePoint
- Web Services
- SOA (Web Services & other)

Why choose Eagle Creek as your development partner?

Increased Services

Through our Development Technology Centers, Eagle Creek possesses the competency to support any development platform for all your development needs, and can support those applications deployed anywhere in the world.

Improved Quality

Eagle Creek is the largest US-based onshore service provider with millions of hours of consulting experience, creating depth and breadth of experience that can be leveraged for your project.

Lower Cost

Our dedicated Technology Centers are substantially lower in cost than onsite services and are more cost effective than offshore. There are also no travel expenses accrued since all services are performed remotely via VPN, hosting development or production environments.

Proximity

Eagle Creek's Technology Centers are no more than two time zones away from any North American location.

Deployment Alternatives To Meet Your Business Needs

IT and Business Executives look to inventive and innovative approaches in the use of technology to achieve competitive differentiation, the creation of singular customer and prospect experiences and capturing market share. In short – contribution to revenue growth.

The ability to cost effectively and quickly develop applications plays a significant role – and identifying a method of achieving this is key. Eagle Creek supports a number of staffing models to help our customers achieve these goals:

- **Single resource** - we can supply single team members to integrate into your current development efforts, from management to analysis to application development to testing.

- **Hybrid Team** - we can incorporate any number of resources to supplement your current development efforts to work in conjunction with your current team members, bringing the required skill sets to the effort and addressing any skill deficiency.

- **Full Cycle Development** - whether you don't have the needed resources in house or your current development resources just don't have the bandwidth, Eagle Creek can supply you with a team to address your complete development efforts. Teams are flexible in nature and have the ability to emulate your development efforts and reporting structures

- **Integrated Team** - Maybe your current staff doesn't have the needed toolset or they may not be familiar with the technologies you want to adapt. We have the ability to integrate customer resources in the team, guide them through the development effort and make sure that all development knowledge is transferred to your staff at the end of the development cycle.

- **Long Term Team** - Not sure of your current staffing requirements or do you have sophisticated products and technologies? No problem; we can supply dedicated teams for your long term staffing requirements.

Eagle Creek Support Capabilities

Eagle Creek provides high quality, cost-effective, support for Custom Application Development. Successful support is a result of quality, experienced consultants in a dedicated environment providing effective Project Management, Business Analysis, Quality Assurance, & Training.
