A holistic approach considers all aspects of data management with emphasis on linking people, processes and technology. Our consultants offer expertise in key components from architecture to integration to master data management. By gaining understand of business goals and aligning objectives to technology, our consultants drive business results and innovation for our customers.

Technology Competency

We are experienced in multiple technologies and a number of different technology platforms including:

- OBIEE
- Microsoft BI
- Informatica
- Microsoft SQL Server
- Birst
- Erwin
- Oracle
- Business Objects
- Cognos
- Cast Iron
- Teradata
- Micro Strategies
- Other ETL Toolsets

Why chose Eagle Creek as your development partner?

Increased Services

Through our Development Technology Centers, Eagle Creek possesses the competency to support any development platform for all your development needs, and can support those applications deployed anywhere in the world.

Improved Quality

Eagle Creek is the largest US-based onshore service provider with millions of hours of consulting experience, creates depth and breadth of experience that can be leveraged for your project.

Lower Cost

Our dedicated Technology Centers are substantially lower in cost than onsite services and are more cost effective than offshore. There are also no travel expenses accrued since all services are performed remotely via VPN or hosting development or production environments.

Proximity

Eagle Creek's Technology Centers are no more than two time zones away from any North American location.

Deployment Alternatives To Meet Your Business Needs

Today's business challenge is determining how to advance the capabilities of your key system applications with minimal costs. We support a number of staffing models to meet your development needs

Some examples include:

- **Long Term Team** – Not sure of your current staffing requirements or do you have sophisticated products and technologies. No problem, we can supply dedicated teams for your long term staffing requirements
- **Integrated Team** - maybe your current staff doesn't have the needed toolset or they may not be familiar with the technologies you want to adapt. We have the ability to integrate customer resources in the team, guide them through the development effort and make sure that all development knowledge is transferred to your staff at the end of the development cycle.
- **Full Cycle Development** - whether you don't have the needed resources in house or your current development resources just don't have the bandwidth, Eagle Creek can supply you with a team to address your complete development efforts. Teams are flexible in nature and have the ability to emulate your development efforts and reporting structures
- **Hybrid Team** - we can incorporate any number of resources to supplement your current development efforts to work in conjunction with your current team members, bringing the required skill sets to the effort and addressing any skill deficiency.
- **Single resource** - we can supply single team members to integrate into your current development efforts, from management to analysis to application development to testing.

Eagle Creek Support Capabilities

Eagle Creek provides high quality, cost-effective, support for Business Intelligence and Data Management initiatives. Successful support is a result of quality, experienced consultants in a dedicated environment providing effective Project Management, Business Analysis, Quality Assurance, Administration & Training.
