- Upgrading sites to the latest Drupal releases
- Project management for enterprise-level Drupal sites
- Performance, optimization, audit, and security checking
- Mobile & responsive Drupal implementations
- Social media integration
- Multilingual support and implementation

U.S. Onshoring - A Unique Delivery Model

Businesses are undergoing a digital transformation more revolutionary than the .com era. New technologies, applications and devices are being released to the market at an accelerated pace. The skills dilemma combined with budget constraints mean companies are being compelled to change their IT sourcing strategy. Internal hires and traditional onsite resources remain elusive and expensive. Offshore cannot provide the communication, responsiveness and speed in the new requirement of the Digital Enterprise.

Eagle Creek's U.S. Onshoring combines on site expertise with our offsite (but onshore) delivery platforms. Achieving this consistent and sustainable way to provision consulting capabilities, reduces our customers' backlogs and optimizes their IT budgets. This has meant investing in America; where Eagle Creek has become the leader in U.S. Onshoring.

Drupal Development Capabilities

Advanced Functionality

Drupal has become one of the most comprehensive Content Management Systems available. Eagle Creek can help you incorporate Drupal's advanced functionality such as advanced menu management, polls management, graphics modification tool, user's management and much more. These functions make it possible to create simple or advanced websites, blogs, discussion boards, social networking pages, etc.

Manage a Variety of Content Types

With Drupal we can help your organization create and manage many content types, like: videos, polls, user management, text, blogs, podcasts, statistics, and implement advanced user, graphics and page content management.

Easy Site Management

We can help you take advantage of Drupal's ability to categorize site content through URL addresses, paths, and custom list development which makes for easy management, search and reuse of the content.

Plugins

We can help you take advantage of the thousands of plugins available with Drupal as well as help you create your own plugins.

Installation and Modification

Eagle Creek can also provide the advanced knowledge to install and modify the rich functionality that scripts offer and the expertise to implement new solutions

Efficiency

We can provide assistance with scalability and efficiency issues to optimize server loads. Our consultants also have advanced knowledge of PHP and HTML languages as well as CSS required for script development.
