Software Services

Company Overview

- Founded in 1999, Eagle Creek Software Services provides consulting and technical expertise to the enterprise.
- We provide Consulting Services in the following areas:
 - CRM - Salesforce, Siebel, Oracle CRM On-Demand, & Oracle Sales Cloud
 - Application Development – Java, .NET & Drupal
 - Data Integration & Business Intelligence
- 350 + consultants, hundreds of major customers including Fortune 1500 and global companies
- Experience across a breadth of vertical markets and industries
- Our unique U.S. Onshoring delivery model allows customers to balance price, quality and risk in software development and support

Drupal Development Services for Higher Education

Eagle Creek provides a full range of Drupal design, development and consulting services for institution of Higher Education, and is able to handle Drupal engagements of any size and complexity. Higher Education User Examples:

Mobile

Conversion to the latest Drupal version along with creating a subtheme to provide responsive behavior.

Campus

Conversion of multiple campus sites from Drupal 5 to Drupal 7, creating a subtheme to provide responsive behavior.

University Service Learning

Custom theming and custom module development for a large complex site that was receiving a high volume of user content updates on a daily basis. The site was configured for custom access protocols, content moderation workflow, and UI elements.

College On-Line

Recreation of a legacy site using Drupal 7 or Drupal 8 with the objective of increasing speed and response times of the site. Included fine-tuned SEO, analytics, and geo-location to customize the content for site visitors. The crucial elements of this project (besides page load times) were data collection and reporting, as this is one of the institution's primary methods of gaining students for their online course sections

Migration

Eagle Creek has managed and executed large scale migrations from a variety of WCM's and CMS's to Drupal.

U.S. Onshoring - A Unique Delivery Model

Businesses are undergoing a digital transformation more revolutionary than the .com era. New technologies, applications and devices are being released to the market at an accelerated pace. The skills dilemma combined with budget constraints mean companies are being compelled to change their IT sourcing strategy. Internal hires and traditional onsite resources remain elusive and expensive. Offshore cannot provide the communication, responsiveness and speed in the new requirement of the Digital Enterprise.

Eagle Creek's U.S. Onshoring combines on site expertise with our offsite (but onshore) delivery platforms. Achieving this consistent and sustainable way to provision consulting capabilities, reduces our customers' backlogs and optimizes their IT budgets. This has meant investing in America; where Eagle Creek has become the leader in U.S. Onshoring.
